\* "Capacity" refers to the number of people fitting into the tent, whilst "Sleeping space" gives you an indication whether you will be lying very close or have some/ a lot of space when using the tent for this amount of people. When using a tent for the maximum number of sleepers, you might not have a lot of space for your equipment, or your equipment could reduce your sleeping space. If you do have lots of equipment, rather go for the minimum number of campers or buy a tent size bigger.

\*\* All tents come complete and ready for use. A carry bag, pole/stake bags and owner's manual are included. All tents come with a 3 year warranty against material and manufacturing defects.
